

Telemarketers' calls are disruptive and the people are pushy and always call at the wrong time. Even if the time was right, they cannot take no for an answer. I know they are doing their "job" but unfortunately there's a lot more people who find their calls unwanted and the majority should be heard and supported. It shows you what New Jerseyans' DO NOT WANT, and our opinions and wants should be respected by the telemarketers and the federal government.
